Matteo Forghieri – Car Rig for Cinema 4D v032:

The described project is a Cinema 4D tool for simplifying car animations, compatible with a wide range of car models and C4D versions (R18 to 2023, excluding C4D Lite).

Built using Xpresso, the tool includes fixes like a "Back Wheel Multiplier" for rigs with uneven wheel dimensions. It offers both animated and non-animated rigs as examples and supports customization for specific user needs.
