Bundle 22 – Australian Home & Garden 02: This Bundle 22 contains 15 species of shrubs, trees, and trees for gardens, sceneries, and general landscaping for Australians, with a variety of models unique to each species that have a variety of forms that can be utilized for the majority of your scenes. The bundle comes in 3DS MAX, Blender C4D, and SKETCHUP format, which requires minimal effort, and is ready to render using the GrowFX formats; you have the most flexibility to alter the plants however you'd like.

Each model was created in the most detailed possible way, accurately representing species used in Corona Renderer, VRay Renderer, and FStorm Renderer in 3D Max.

Our FBX format contains all textures ready to be loaded into any other software.

Our SketchUp file format supports three rendering engines: VRay, Thea, and Enscape, including proxy files. SketchUp is entirely suitable for Skatter.

Users can also choose Blender using Cycles or Cinema 4D with VRay and Corona Renderer.

The models we use for MESH models need 3Ds Max 2014 or higher in addition to minimum Corona 3.0, VRay 3.6, and Form 1.35. We also support the entire Forest Pack library for all three renderers.

List of Species:

- Acacia Podalyriifolia
- Anigozanthos Flavidus
- Astelia Chathamica
- Austromyrtus Dulcis
- Austromyrtus Tenuifolia
- Backhousia citriodora
- Banksia Spinulosa XXXXXX
- Correa Dusky Bells
- Corymbia ficifolia 'Wildfire'
- Eremophila Glabra 'Kalbarri Carpet'
- Grevillea Robusta
- Liriope Muscari
- Pittosporum Tenuifolium
- Schinus Molle
- Syzygium Cascade
