Locate and Employ plugins, effects, presets, scripts, Extensions, menu controls, and expressions with lightning speed!

Quick Menu is a launcher that looks over your UI When invoked by a user-friendly shortcut. It's intuitive and smart and enables you to quickly establish plugins, effects, presets, scripts, expressions, extensions, and many menu controls in After Effects. This lets you focus on creating rather than disrupting your workflow by searching through menus.

NEW FEATURES IN QUICK MENU 3

- New Searching Engine
- Recent Commands
- Toolbar UI Style
- Customize Command Icons
- Shape Layer Filters
- Favorite Commands
- Static Commands
- Custom Command Groups
- Create Expression Controls
- Displayable Command Options
- Shortcuts
- Auto-detect Installed Extensions

New Changes:

- New command to render a frame at Current Time Indicator.
- New command to render frame(s) at Layer or Comp marker(s).
- Remember recent commands from a previous AE session.
- Ability to add the user's ScriptUI Panels folder as a resource.
- The user's repository for "extensions" is included by default as a resource folder.
- Preference to Hide/Show bottom toolbar.
- CC 2024 (Beta) support.
- License framework update.
- The impact can be applied to all selected layers.
- Auto-create a Strong or Adjustment layer to apply the result to.
- Hunting Engine matches any area of the control name.
- Case Sensitivity eliminated from Hunting Engine.
- Headless UI.
- UI onto another screen.
- Launch Extensions.
- New MENU COMMANDS EDITOR (Insert, remove, disable menu controls).
- Additional built-in support for your Menu Commands attributes for your GERMAN and FRENCH languages.
- The Menu Controls feature is not limited to different languages (refer to the user manual for information).
- Bug fixes.
