

## CData Drivers for Tally v24.0.9111 (11 Dec 2024) All Platforms + License Key

2024-12-18 23:04:00   [label](#)   [我要反馈](#)   [下载页面](#)

revolutionize data integration by providing seamless connectivity between Tally ERP and a multitude of reporting tools, databases, and custom applications. With unparalleled query performance and comprehensive metadata access, these drivers empower businesses to effortlessly access and analyze real-time Tally data within their preferred BI, analytics, and reporting platforms. Additionally, the suite of drivers and adapters enhances ETL processes, facilitating robust, reliable, and secure data movement for replication, warehousing, and operational reporting needs.

Through support for popular database protocols like ODBC, JDBC, and ADO.NET, as well as specialized interfaces for SQL Server and MySQL, **CData Drivers for Tally** ensure effortless connectivity and management of Tally data across a wide range of database management applications. Developers benefit from a data-centric model that simplifies integration, enabling faster application development and higher-quality solutions. Moreover, the virtual database abstraction layer provided by the drivers enhances data virtualization capabilities, supporting advanced features such as query federation and predicate pushdown for enhanced flexibility and efficiency in data management.

In essence, **CData Drivers for Tally** streamline data integration processes, offering a robust solution for businesses to leverage Tally ERP data across their entire ecosystem of applications and platforms. Whether for BI and analytics, ETL workflows, data management, or application development, these drivers provide the essential tools and technologies to unlock the full potential of Tally data, empowering businesses to make informed decisions and drive success.

### This package includes the following components:

- Excel Add-In for Tally
- Tally ADO.NET Provider

Web & Script

- Tally BizTalk Adapter
- Tally Data Cmdlets
- Tally FireDAC Components
- Tally JDBC Driver
- Tally MuleSoft Connector
- Tally ODBC Driver
- Tally Power BI Connector
- Tally SSIS Components
- Tally Tableau Connector

## Key Features of CData Drivers for Tally :

1. Unmatched query performance
2. Comprehensive metadata access
3. Seamless integration with BI, analytics, and reporting tools
4. Support for ETL processes, including replication and warehousing
5. Reliable and secure data movement
6. Connectivity via popular protocols like ODBC, JDBC, and ADO.NET
7. Specialized interfaces for SQL Server and MySQL
8. Simplified integration for developers
9. Data-centric model for accelerated application development
10. Enhanced data virtualization capabilities
11. Advanced features such as query federation and predicate pushdown
