Unreal engine - Hologram Display Pack v4.27

2025-02-10 16:59:57   label 我要反馈   下载页面

Unreal engine - Hologram Display Pack v4.27: The ALL HOLOGRAM DISPLAY Pack is a comprehensive collection of hologram display models and materials, offering developers a wide range of customization options. This latest update includes 8+ widget interaction blueprints, providing functionalities like sliding, checkboxes, radio buttons, and previous/next buttons, making it easy to integrate interactive elements into holographic displays.

Additionally, the pack features 27+ hologram materials and material instances, offering diverse options such as scanlines, grids, media holograms, lighting effects, and dissolve effects to enhance visual effects. With 12+ hologram display models available, including showcases, cylinders, tables, media screens, pyramids, and flats, developers have ample choices to create unique holographic displays tailored to their projects.

In addition to the hologram display components, the pack also includes 170+ UI elements and icons, further expanding customization possibilities for user interfaces. With various widgets and icons available, developers can design intuitive and visually appealing interfaces to seamlessly complement their holographic displays. Moreover, the pack offers 4+ sci-fi-level design modules, providing additional assets to enhance the futuristic atmosphere of the holographic environments.

With 12 blueprints, 11 widgets, 277 images and textures, 58 materials, and 33 static meshes, the ALL HOLOGRAM DISPLAY Pack offers a comprehensive toolkit for developers to create immersive holographic experiences. While tested on Windows platforms, the pack is compatible with various development platforms, allowing developers to effectively build holographic displays for their target platforms. Whether creating sci-fi games, simulations, or interactive experiences, this pack offers essential resources for elevating holographic visualizations and user interfaces.
