Unreal Engine - Sky Creator:

Introducing Sky Creator, a powerful tool designed for Unreal Engine that puts you in control of dynamic weather and time of day through realistic volumetric clouds, atmosphere, and visual effects. With a user-friendly built-in weather preset system, you can effortlessly craft diverse weather conditions and lighting scenarios, seamlessly switching between them in real-time. Note that Sky Creator includes example blueprint controllers located at "SkyCreatorPlugin Content/Blueprints" and an illustrative map at "SkyCreatorPlugin Content/Maps."

Quickstart:

1. In Place Mode, select the "Lights" category.
2. Drag and drop Sky Creator onto your level.

- **Weather Presets System:** Create a variety of weather and lighting conditions effortlessly.
- **Unified Multi-layered Volumetric Cloud Material:** Enjoy a versatile cloud material with extended quality settings.
- **Art-Directable and Customizable:** From realistic cloudscares to stylized skies, achieve the look you desire.
- **Modular Design:** Control Sky Creator with your own blueprint time manager or weather controller.
- **Built-in Weather and Material FX:** Access CPU & GPU particles for Rain, Rain Splashes, Snow, Lightnings, Volumetric Wind, and more.
- Apply shaders for effects like Wetness, Puddles, Rain Ripples, and Snow.
- **Runtime Occlusion System:** Smooth falloff for enhanced occlusion effects.
- **Sun & Moon Positioning Models:** Simplified and realistic positioning models for Sun & Moon.
- **Photorealistic Starmap:** Starmap with rotation, star twinkle effect, moon phases, and more.
- **Lightweight and Easy to Use:** Prioritizing simplicity without compromising functionality.
- **Game-Ready Optimization:** Ensuring optimal performance for seamless integration into your project.
- **Weather Preset Examples:** 39 included examples for diverse weather scenarios.
- **Blueprint Controllers:** Included examples to facilitate ease of use.
- **Network Replicated:** Enables seamless replication across networked environments.

Sky Creator brings realism and artistic control to your Unreal Engine projects, offering a comprehensive solution for dynamic weather and atmospheric effects.
