Aescripts ToothPaste v1.2.4:

"ToothPaste" by Sergio Ribero is an After Effects tool designed for quickly pasting SVGs from the clipboard into projects.

Users can copy SVGs from design apps like Figma, Sketch, or Affinity Designer and paste them as shape layers in After Effects with ease.

Key features include maintaining editable text, gradient support, clip-paths and masks, and the ability to split groups into separate layers.

The tool offers a user-friendly interface that can be docked in the workspace, with future updates planned to support layer styles, effects, and raster images.
