CyberLink ColorDirector Ultra 2024 v12.6.4225.0 (Win):

Illuminate your photos

Enhance with authentic effects such as lights, glimmers, or lens flares.

- Unfocused beauty (Bokeh)
- Sun-kissed natural rays
- Illumination with grace
- Glittering brilliance (Sparkle)
- Playful lens embellishments (Lens flare)
- Subtle, artistic light seeping through (Light leak)

"CyberLink ColorDirector Ultra" Sample:

Revamp your visuals

Infuse your footage with a vintage charm. Adjust the focus or replicate signal disruptions for a cinematic touch.

- Film Grain
- Digital Glitch
- Subtle Blur
- Vignette
- HDR Enhancement

Craft a unique ambiance for every scene

Splash vibrant colors

- Isolate a hue and fine-tune intensity to elevate the style of your footage.

Refined tonal balance

- Tailor highlights, midtones, and shadows for a harmonized aesthetic.

Establish a cohesive, polished appearance

- Effortlessly integrate and export lookup tables (LUTs) to infuse mood and cinematic contrast into your footage.

Personalize your clips

- Efficiently mirror the color style from each reference video, ensuring a uniform look across diverse shots.

Expert Color Management

Utilize advanced tools to gauge and analyze colors in an image, ensuring uniformity across your shots.

- Histogram
- RGB Parades
- Waveform

Unlock dynamic effects through keyframes
