Mandy Ford - Situational Lighting Presets v2:

The Situational Lighting Presets introduce a new set of tools to photographers to help them shoot under the most challenging lighting situations, especially during weddings. Searching for 35 perfectly crafted presets and changes to work on alongside 11 undertone profiles, this toolset will maximize your workflow while maintaining the quality of the finished edits.

For Adobe Lightroom CC 11.5+ and Adobe Camera Raw 14.5+, these presets offer sun-blast, lowlight, mixed light, golden hour and backlit adjustments, and so many more. Also, specialized tuning tools give you the ultimate creative control, like intensity idle sliders, color correction, and medium format grain effects.

Palettes offer considerable benefits, which:

- None of the volume controls can lessen the detail in the underscores.
- One-click breathtaking wedding photographs

This is a non-refundable digital product aimed at photographers, regardless of their skill level, looking to optimize their workflow and produce exceptional images with little effort.
