In this course, I'll guide you through the basics of navigation and working with AfterEffects. We'll recreate a moving image and discover the AfterEffects interface and its tools of the trade. This class is great for those who have an understanding of the applications that work with layers, such as Photoshop, Illustrator, and Fresco. It will also be an excellent introduction for intermediate Video editors who have worked with Premiere Pro and want to explore AfterEffects. In this regard, I'll try to make things as simple and succinct as possible for those with little or no experience using these programs.

This course is ideal for anyone looking to try their hand at AfterEffects; however, I find the program to be a bit difficult and confusing. It's true that I can't teach you everything as AfterEffects is a fast program, but hopefully, I'll teach you the language and knowledge to be able to use certain of its functions.

To take this course, you'll require access to the most recent version of Adobe AfterEffects, which is best obtained through the Creative Cloud account. Additionally, you'll require an internet connection, as well as some gigabytes of space on your PC, to download the videos and follow me as I develop the course.
