Blender Market - Wrap Master:

The provided content describes a tool or feature that allows wrapping various materials, such as bandages, ropes, chains, or fabric, around 3D models.

- **Length:** Adjusts the overall length of the wrapped material.
- **Noise Strength:** Controls the distortion or randomness applied to the wrap.
- **Noise Parameters:** Offers a schematic view with settings like frequency, tuck end, and pinch to refine the wrap's irregularities.
- **Width Influence:** Affects how the width of the material changes along its length.
- **Subdivision (subdiv):** Increases the mesh resolution for smoother results.
- **Snap to Surface:** Ensures the material conforms to the surface of the model.
- **Tear:** Adds the ability to create ripped or torn sections in the material.

This functionality is useful for creating dynamic, natural-looking wraps on 3D objects.
