### Blender Market - Light Painter v1.4.2:

LightPainter revolutionizes lighting in Blender by enabling artists to paint light directly onto 3D models, creating dynamic, immersive scenes with ease.

Designed for use with Blender's Cycles rendering engine, it leverages ray tracing to deliver stunning, high-quality illumination.

This intuitive tool allows users of all skill levels to effortlessly adjust light color, intensity, and specular highlights with simple brush strokes. Customizable options include randomized light colors, temperature adjustments, and dynamic emission control, offering unparalleled creative freedom. LightPainter simplifies the lighting process, empowering artists to focus on their vision and elevate their creations.
