Advanced 3D Animation: Create Professional Renders with Blender: When 3D animator and designer Derek Elliott began exploring Blender, He didn't know it would change his entire profession. Originally a product designer, Derek soon discovered that learning to model and animate within Blender opened up a world of new opportunities—including creating product animations and investment-seeking presentations for companies worldwide. With a growing community of more than 220K on YouTube and Instagram, Derek loves sharing the capabilities to use Blender to create exciting 3D renders.

A specialist in 3D animation, Derek has an excellent opportunity to demonstrate how to make a full-fledged commercial for your skincare company using Blender. Using Blender's most sophisticated and fascinating methods and tools for animation, Derek will guide you through the steps to include armors, use the rigid body simulation, and then add fluid, smooth camera motion to your final piece.

With Derek at your side With Derek by your side, you'll:

- Design a sophisticated multi-cam video animation by using storyboards
- Utilize armatures as well as rigid bodies and curves to create a realistic-looking motion
- Create your video using natural camera motion

In addition, you'll have an extra class in which Derek offers his top advice to get into the 3D design business and land your first pay-per-hour gig.

Suppose you're awestruck by the field of animation for products or trying to enter the 3D animation field with a solid set of skills and experience. In that case, you'll be equipped with a broad range of the latest 3D animation techniques and the potential to create an entirely new career path.
