

Blender Market - Quick Procedural Terrain & Water Addon v1.0

2025-02-10 16:50:48 [label](#) [我要反馈](#) [下载页面](#)

Blender Market - Quick Procedural Terrain Addon is an extensive addon for landscape design, focusing on realism and detail with a simplified process. The addon combines GPU-based procedural terrain shaders and geometry nodes to facilitate swift, detailed results for sophisticated and extensive lands. It includes 7 pre-defined biome-specific terrains and unlimited possibilities regarding modifying the terrain's size, shape, texture, colour, and more. The add-on also provides advanced water-making tools, enabling users to generate realistic, animated bodies of water, expressively controlling waves, currents, and other parameters. In addition, the user has complete control over lighting, atmospheres, and weather through the integrated world settings, allowing for the effortless creation of realistic natural scenes.

- **GPU-Accelerated Procedural Terrain Shaders:** Ensures high-quality performance even in complex water scenes, with fast rendering for large terrains.
- CPU-Based Geometry Nodes make realistic and detailed terrain and water bodies, creating rich environments.
- **7 Terrains:** Simple and efficient production of quick biomes such as Desert, Ice Land, Wet Land, Desert Water, Ice Waters, Mountain, and Tundra.
- **Terrain Settings:** Modify the terrain to the desired size and shape with custom detail texture and colour settings, including adding custom displacement maps.
- **World Settings:** Manipulate lighting elements, time, and weather, including the sun setting and placement and the sky box, to immerse the set in complete control.
- **Water Settings:** Control the complexity of water bodies by defining their size, shape, and depth while creating animated colour, wave, and current settings for truly dynamic water behaviours.
- **Performance Optimization:** Paralleled management of CPU and GPU ensures smoother performance while working with large, intricate terrains without loss in beautification value or speed.
