

AeScripts AEC4D Pro v1.0.6 R23 (Optimizes the workflow between Cinema 4D and After Effects)

2025-02-10 17:15:29 [label](#) [我要反馈](#) [下载页面](#)

The most superior C4D -> AE Importer

Overwrite Layers...

You've exported Objects to After Effects and now you've got modified some parameters and you want to replace solely these Layers in your contemporary Composition? No Problem!

AEC4D-PRO is aware of which Objects you've got exported!

Select the Objects you favor to update and hit Overwrite Layers, the Objects you have had chosen in Cinema 4D, are going to be up to date right away in After Effects.

Import Textures, Stills & Multipasses!!!

Importing your renderings and snapshots has by no means been so easy...!

[DEFAULT-CLICK]: Open After Effects if it is closed, or set off your modern-day selected Version.

[ALT-CLICK]: Switch rapidly between your established After-Effects Versions.

[SHIFT-CLICK]: Import Textures, Stills & Multi passes

By default the route from your render settings: Regular Image 'File...' is used to search for multipass and footage... (c4d-tokens and relative paths will routinely be converted.) Oh, and you can additionally specify your very own course inside the "Settings".

- Handling of Stage-Objects
- Support for Text-Layers
- Export "Film-Offset"
- Export Markers
