

CData Drivers for FTP v24.0.9060 (21 Oct 2024) All Platforms + License Key

2024-12-18 23:01:45 label 我要反馈 下载页面

CData Drivers for FTP offers a comprehensive suite of bi-directional drivers and connectors designed to simplify FTP data integration across diverse applications. These drivers enable easy access to FTP servers from any location, facilitating real-time data retrieval for BI tools, analytics platforms, reporting systems, ETL processes, and custom applications. Supporting popular protocols like ODBC, JDBC, and ADO.NET, CData's drivers provide a seamless experience for users working with FTP data in database management tools.

The versatility of **CData Drivers for FTP** extends to workflow automation, allowing effortless integration with popular tools like BizTalk, MuleSoft, SQL SSIS, Microsoft Flow, Power Apps, Talend, and more. Developers benefit from a simplified data-centric model for FTP integration, enhancing application development speed across various technologies. Furthermore, CData's drivers excel in data virtualization, offering a virtual database abstraction layer for FTP data with advanced features such as query federation and predicate pushdown, ensuring efficient and streamlined data virtualization processes.

In summary, offers a user-friendly approach to accessing and managing FTP data, providing seamless connectivity for BI and analytics, ETL processes, data replication, and software development. Their drivers empower organizations to optimize operational reporting, increase query performance, and support data governance initiatives, making them valuable for efficient, reliable, and secure data integration.

This package includes the following components:

标签

- Other Web & Script

- Excel Add-In for FTP
- FTP ADO.NET Provider
- FTP BizTalk Adapter
- FTP Data Cmdlets
- FTP FireDAC Components
- FTP JDBC Driver
- FTP MuleSoft Connector
- FTP ODBC Driver
- FTP Power BI Connector
- FTP SSIS Components
- FTP Tableau Connector

Key Features of CData Drivers for FTP :

1. Bi-directional drivers for easy FTP data integration
2. Access live FTP server data from BI, analytics, reporting, ETL, and custom apps
3. Seamless connectivity with BI and reporting tools for real-time FTP data
4. Streamlined ETL processes and data replication to RDBMS or data warehouse
5. Direct FTP data management from popular database management tools
6. Integration with workflow and automation software such as BizTalk, MuleSoft, SQL SSIS, Microsoft Flow, Power Apps, Talend, and more
7. Simplified FTP integration for developers across various technologies
8. Virtual database abstraction layer for FTP data supporting query federation and predicate pushdown in data virtualization
9. Fast and efficient query performance with comprehensive FTP data access
10. Robust, reliable, and secure data movement for ETL, replication, and warehousing
11. Support for standard protocols including ODBC, JDBC, and ADO.NET for easy connectivity
12. Versatile compatibility with popular data migration, ESB, iPaaS, and BPM tools
