#### Aescripts SubMachine v2.3.1:

**SubMachine** is an advanced subtitling add-on for Adobe Premiere Pro, designed to make the process of adding and customizing subtitles easier.

It includes a range of motion graphics templates (MOGRTs) that simplify subtitle animation without requiring additional software like After Effects.

The tool supports multiple languages and allows users to adjust templates or create new ones.

SubMachine works with Adobe Premiere Pro CC 2022 and newer versions, with updates provided through Discord.

Note that it has compatibility issues with Premiere versions 24.2 and 24.2.1.
