Connect to X-Cart via BI analytics, analytics, and reporting tools using drivers based on standards.

Integrate with BI Analytics, Reporting, ETL Tools, and Custom Solutions.

CData Drivers to X-Cart Excellent Features:

Our drivers are the fastest and most straightforward method to connect live X-Cart data with reporting, analytics, BI, and data visualization techniques. They offer unbeatable query performance and a comprehensive view of metadata and X-Cart data in addition to seamlessly integrating with preferred analytics tools.

Our X-Cart integration tools are robust, secure, reliable data transfer from adapters and drivers that extend your favorite ETL tools that have X-Cart connectivity to ETL/ELT tools that allow replication.

Connect to your RDBMS and your data warehouse to X-Cart to make it easier for you to report operationally and offload queries to improve performance, assist in initiatives for data governance, store information for disaster recovery, and much more.

With support for the most popular databases protocols, such as ODBC, JDBC, and ADO.NET, it supports wire-protocol protocols for SQL Server and MySQL; it is simple to connect and manage X-Cart's information from a range of management tools for databases.

Connect to X-Cart using famous data migration, ESB, iPaaS, and BPM tools.

Our adapters and drivers provide easy access to X-Cart data from popular programs such as BizTalk, MuleSoft, SQL SSIS, Microsoft Flow, Power Apps, Talend, and many others.

The most straightforward way to integrate with X-Cart from any location. Our X-Cart drivers feature an X-Cart model that is data-centric X-Cart which dramatically eases integration. This allows developers to develop better applications more quickly than before.

Our drivers create an abstraction of a virtual database on top of X-Cart's data. They also provide popular features for data virtualization, such as query federation using sophisticated capabilities to delegate queries or predicate pushdown.
