The Unity Asset - Winter Lands, Creating a visually stunning winter landscape for your game doesn't have to be challenging. With Winter Lands, you can embrace the northern winds and easily craft a snowy environment.

This asset package includes over 260 modular prefabs, nearly 100 tileable maps, and a custom shader library, enabling quick-level creation.

"Unity Asset - Winter Lands" Samples:

Highlights include particle effects, over 100 decorative elements, a demoscene, and 12 custom shaders editable with Amplify Shader Editor. Special snow shaders maintain visual consistency when scaling or rotating prefabs. Optimized for performance with three LODs per prefab, Winter Lands is also Gaia-ready with a premade biome and supports The Vegetation Engine.
