Imperial – Magazine Scene Creator (PSD, PDF): Imperial is an extremely high-resolution book and magazine mockup maker. Its simple, natural design lets you create endless scenarios that are perfect to display magazine or book designs, flyers, guidelines for branding as well as photo journals, and much more.

Imperial provides complete 360deg control over the shadow, so you'll never see the identical scene in two different locations. You can also select between thin and thick shadows according to your preferences.

Shadow overlays are based on actual photographs, which allows you to make stunning visuals.

The PSD document is well identified and organized so that it is easy to edit key elements. Also, a help manual is that you can refer to if you need to be concerned about getting lost in all the options.
