

Past To Future Samples Innerspeak Drums!

2025-02-10 16:40:47 [label](#) [我要反馈](#) [下载页面](#)

Past To Future Samples Innerspeak Drums!: We tried something new when making this album. Two versions were recorded using even more hi-fi (still processed using external analog gear such as Distressors, Dbx-165a, and lots of Fridmannish processing). This version is more similar to what you'd find in the studio. Also, we put all the drums through the Boss Br-864 recorder precisely as the album and recorded it too! The digital recorder that has the built-in limiter sounds fantastic and unique!

You can get an audio version more hi-fi and an incredible Lo-Fi version that is more like the album's sounds!

The Hi-fi or Boss Br-864 version can be selected through our customized Kontakt GUI.

Gfx plugin details of Past To Future Samples Innerspeak Drums!

The product is in the **SOUND EFFECTS** category, for more information about this post you can click on the home page link in the sidebar.

- 24bit/48khz
- The *Wave file is available even if you do not utilize Kontakt!
- Custom GUI that has two different drum sounds to choose from!

Future Includes:

- BossBd
- BossCym
- BossHh
- BossSn
- BossTom
- CleanBd
- CleanCym
- CleanHh
- CleanSn
- CleanTom

What is Innerspeak Drums

"Innerspeak Drums" is a sample pack or sound library created by Past To Future Samples. This sample pack features drum sounds that were recorded in a unique way, using high-quality equipment and analog gear such as Distressors, Dbx-165a, and other processing tools, giving the drums a distinct and professional sound.

Additionally, the drums were recorded through a Boss Br-864 recorder, which has a built-in limiter, providing a unique and characterful sound to the recordings.
