

## CINEMTIC LUTs V-LOG for Premiere – Bounce Color

2025-02-10 17:15:44   [label](#)   [我要反馈](#)   [下载页面](#)

Cinematic LUTs were among our earliest designs on Bounce Color. However, we've revamped the LUT pack, with brand-new colors that are more suitable for modern cameras.

Check out our other pack here:

- Urban Dark LUTs
- Nature LUTs
- Filmic Tone LUTs

### CINEMATIC LUTTS

Here's a set of video clips that have been captured using the Cinematic LUTs.

These LUTs were created to be compatible with all cameras. They are available in the Rec709 color space and Log for all major cameras.

## Gfx plugin details of CINEMTIC LUTs V-LOG for Premiere – Bounce Color

The product is in the **LUTS category**, for more information about this post you can click on the home page link in the sidebar. To search for similar products to CINEMATIC LUTs V-LOG for Premiere – Bounce Color,

### Installing multiple LUTs in Premiere Pro (PC)

1. Unzip the downloaded file
2. Go to the C:// folder, and open Program Files. Open Adobe, then open Adobe Premiere Pro CC.
3. Drag and drop the downloaded and unzipped LUTs folder into the Creative folder.
4. Restart Adobe Premiere Pro CC
7. In the Color panel, go to Creative. Under Creative, select the Look dropdown menu
8. Choose a look from the list and voilà: your footage is graded!
