These .CUBE files are compatible with a wide range of professional video editing and compositing software, including Final Cut Pro, Premiere Pro, DaVinci Resolve, and Photoshop.

LUTs are essential tools in image processing, converting pixel colors to achieve specific aesthetic effects, and are supported by devices working with LOG or Rec.709 formats. Compatible with macOS (10.14.6 or newer) on both Apple silicon and Intel chips, the package includes hand-picked cinematic looks to enhance your post-production process.
