Aescripts Automation Blocks v1.0.001 (Win, Mac): Automation Blocks is an endless assortment of ready-made single-click tools to complete any job. With Automation Blocks, you can completely personalize the tools and even design your own!

Extensive Library of One-Click Tools

Automation Blocks is an endless assortment of ready-made single-click tools to complete every job. With Automation Blocks, you can completely modify the tools or even create your own!

There are numerous tools to count them all. However, here are some important points:

- Comp Duplicates From Spreadsheet
- Color Palette Workflow
- Comp Time Tools
- Expressions
- Guides
- Keyframes
- Precompose on Steroids
- Project Cleanup
- Randomize
- Rigs & Presets
- Text From/To Spreadsheet
- Sync Folders

Community Library

Automation Blocks is a collection of all scripts available to the community. They are stored in a shared folder that you can browse via Dropbox, Google Drive, or GitHub.

Instead of programming code, the tools are built on blocks. Creating tools is much more like playing Lego bricks rather than programming. That magic begins when you modify the tools to suit your need or even write your custom tools!

Change Anything in the Ae Project

Import footage, edit layers, and comps render - you can accomplish anything using Automation Blocks.

Create Custom User Interfaces

Create custom dialogs using numbers and text inputs Checkboxes, dropdown lists, checkboxes, and file selection tools.

Manage Your Files

You can handle everything - not just within the Ae application, but the hard disk! Set up folder plans for your project, tidy up, or back up files.

Use Spreadsheets

Write and read spreadsheets and text files. Automation Blocks allow you to work with files efficiently.

Use Keyframes

Working with keyframes is just as simple as copying & paste. In addition, with intelligent keyframe adjustments, newly added
