

## DMSoft DBConvert for Access and SQLite v1.1.6 + License Key

2025-01-06 23:22:44    label 我要反馈    下载页面

provides comprehensive support for converting SQLite databases to Microsoft Access (.mdb or .accdb format) and facilitating seamless synchronizations, regardless of the combination. Packed with many features, our software ensures swift and hassle-free migration and synchronization tasks. With an intuitive wizard interface, users can navigate the process effortlessly, while our robust command line mode offers full control over program execution. Additionally, our built-in scheduler allows for convenient task automation, enhancing overall efficiency.

## Key Features of DMSoft DBConvert for Access and SQLite:

- 1. Supports conversions from SQLite databases to Microsoft Access (.mdb or .accdb format)
- 2. Facilitates synchronizations between SQLite and Access databases in any combination
- 3. Intuitive wizard interface for easy navigation through migration and synchronization tasks
- 4. Powerful command line mode provides users with full control over program execution
- 5. The built-in scheduler enables convenient task automation for enhanced efficiency
