Learn how to utilize the landscape and light to create memorable portraits

Beyond studios and lighting setups, Nicole Arcuschin - a photographer who specializes in portraits and landscapes - has been able to create photography using natural light as her method of expression. Portraits are the primary focus of his photography however, in his work, the models are a part of the natural world and light, resulting in special images.

In this class, you will be able to understand photography from a personal perspective. Nicole will demonstrate her methods of work and will show you how she makes the most of the natural light during different time of the day, the most important aspect that makes her photos unique and personal.

The course

The first step is to get acquainted with Nicole's work, and she will explain her style of photography. Additionally, you will learn about the work of artists who have influenced her and will discuss what things you admire the most.

After that, he will inform you more about the photograph the significance of it, as well as how important natural lighting is in capturing the moment that is unique.

Based on the suggestions of Nicole With the help of Nicole, you'll be able to work on organizing your photo shoot with nature as the backdrop. The first thing to decide on your models. Then you'll make choices regarding makeup and style and then decide on the most important aspect: the location and the time you'll take the photos shoot.

Nicole will discuss the equipment needed for shooting, and will show you how to prepare during the days prior to and during outdoor shooting.

You'll see a photo taken by Nicole and she will explain what she does to create the atmosphere she wishes to create in each photo.

When the session is complete after which you can complete the digital editing using Lightroom as well as Camera Raw. You will choose the most appealing images and create the final version.

What is the course's goal?

You'll make a collection of photos using as a lighting source just natural light.

Who is it intended for?

Anyone who is enthralled by natural light, who is seeking new ways to express themselves and find new avenues to express themselves.

What do you require

It is essential to be familiar with how to use an SLR camera, either analog or digital in manual mode. It's also helpful to be familiar with Lightroom and Camera Raw.

For the tools for the equipment, you'll require a reflex camera and computer.
