Joakim Karlsson – Thai beach – LR Preset Package: This is a set of four presets that work with Adobe Lightroom. This includes the latest XMP files and the old Lrtemplate files to ensure compatibility with every version of Lightroom. The presets are designed to work with different lighting conditions. One is morning light in the shade, another is a shade between the sun and shade, another is made with a mix of sun and shade, and the last is the golden hour in the evening.

The photos were taken in natural light, and no modifiers or reflectors were employed. However, this doesn't mean you cannot use them for different lighting, and it's your choice to experiment.
