Safari is part of the Adventure Series presets. It has faded highlights, a creamy tone, creating a dreamy character for travel, wildlife, portraits, and landscape images.

COMPATIBILITY

- The best results can be achieved with the RAW/DNG file. Jpeg files produce unpredictable results.
- Compatible with Lightroom 6 & CC

You also get 2 additional versions of the present: one is a minus (decreased) version that can be used to make subtle edits, and another is a plus version (increased).
