MouseBoost Pro v3.6.3 (Mac): MouseBoost Pro is a powerful tool designed for Mac users, offering over 30 utilities accessible with a right-click to enhance productivity. It allows you to customize the right-click menu based on your specific needs, whether you're a programmer, designer, or other professional. This personalization makes it a valuable resource for optimizing your workflow.

- **File Creation & Management:** Quickly create custom files, and manage, move, copy, and organize files efficiently.
- **Quick Access & Shortcuts:** Streamline workflows with app shortcuts and commonly used directory access.
- **Script Integration:** Run custom scripts to automate tasks, enhancing productivity.
- **Privacy & Security:** Hide files for privacy and lock them to prevent accidental changes.
- **Customization & Personalization:** Customize folder icons, menu layout, and app shortcuts to suit your preferences.
- **Image & File Utilities:** Convert images, generate icons, and access detailed file info like cryptographic hashes.
- **Convenience Tools:** Color picker for HEX/RGB values, terminal access in directories, file sharing options, and advanced file operations.
