Blender Plugin – Baga Rain Generator: Create intricate rain scenes using the highest quality. Addon that is based on Geometry Nodes

How to use Density control, rain height Speed, and speed of splashes in the blender market?

you can use Blender Plugin – Baga Rain Generator.

Where can I download the product?

After subscription, You can download it for free from here.

Only the surfaces that are subject to Rain are affected. Two methods for distributing Rain are available for more miniature scenes (rain distribution is calculated based on the size of the project, which is more precise) and another for more immense sceneries (rain distribution is calculated for each object, which is faster).
