Blender Market – Luminar Light Groups v1.0.3: Introducing Luminar Light Groups, an advanced Blender add-on designed to streamline and automate creating and managing Light Groups in Blender's Cycles engine.

Why Light Groups? In the realm of 3D rendering, effective light management is essential. Light Groups, a feature within Blender's Cycles render engine, empowers artists to organize multiple lights, allowing for seamless control and adjustment as a unified entity. This functionality simplifies the modification of intensity, color, and other properties across grouped lights simultaneously, offering precise control over scene lighting. Yet, manually managing light groups can be time-consuming and intricate, particularly in scenes with numerous light sources. Enter Luminar Light Groups! This tool automates the creation and assignment of light groups in Blender, streamlining your lighting workflow and allowing you to focus on creating stunning visuals.

How does it work? The Luminar Light Groups add-on simplifies your lighting process by automatically generating and assigning light groups based on their names, saving time and reducing manual effort.

Experience a more efficient lighting workflow with Luminar Light Groups, enhancing your ability to create captivating visual experiences in Blender.

- Customizable Settings and Real-Time Updates: Define your Index number and Separator symbol to align with your naming conventions. The add-on dynamically updates light groups in real-time as you add, remove, or rename lights in your scene. It works for all kinds of Cycle lights, including Mesh and World Lights.
- Start/Stop Control: Convenient start and stop controls allow you to toggle automatic management on and off for manual adjustments.
- Automatic Light Group Organization: Run the Automatic Light Group Organization with a single click in the Add Menu.
- Fully Integrated UI: The user-friendly interface seamlessly integrates into the Blender preferences panel, offering an intuitive and familiar experience.
