

Blender Market – Sad Cursor v2.0

2025-02-10 17:04:42 [label](#) [我要反馈](#) [下载页面](#)

Blender Market – Sad Cursor v2.0: Utilizing using the "Sad cursor" tool you can alter the location as well as the orientation 3D cursor with just one click. The process of using it is easier and faster and there is no need to press many keys to accomplish one thing. The ability to change its orientation and make precise movements has been difficult to achieve. You can also assign your preferred hotkey to each step to ensure that it doesn't interfere with other add-ons.

We created "Sad Cursor" for ourselves to help make the modeling process in Blender more efficient and fluid.

- Change location that is the position of the mesh pivot 3D cursor's location;
- Reset the 3D cursor's orientation while preserving the location
- How to utilize:
- Configure your preferred hotkey (in the settings for add-ons, the which defaults to D)
- Hold LMB to move the 3D cursor's cursor onto the vertex/edge/face
- Hold Shift plus LMB to change the location of the 3D cursor with no rotation
- Click Ctrl + LMB to change the 3D cursor's orientation according to the vertex, edge, or face
- "W" is the key to changing the point of origin to the 3D cursor
- Hold E to set the default rotation of the 3D cursor
- Press your preferred hotkey once more to close the tool options
