The 18 photo overlays are PNG images that have a transparent background (5700x 3000px 300 DPI)

Compatible with any program that lets you use layers (Photoshop, Photoshop Elements, Paint Shop Pro, etc.)

Note to Lightroom users - please ensure that you are using the right plugin to work using layers.

Overlay your photo, then erase using a gentle brush this portion of the overlay that's over the face, or that you have no need for. Mix and mix them, alter both the opacity and color to get a dark or soft appearance, and change the colors of the overlay using hue/saturation tools.

You'll need software that can support JPG files, as well as JPG files, and also play Zip files.

You'll need a basic understanding of Adobe Photoshop and know how to manipulate layers.

It is compatible with Adobe Photoshop, Adobe Photoshop Elements
