What are Porous Stone 3D Letters?

Porous stone 3D letters are three-dimensional letters or characters designed and crafted to resemble porous or textured stone materials. These letters are often used for various purposes in signage, branding, architecture, and artistic displays.

The production of porous stone 3D letters involves various methods and materials, including CNC machining, laser cutting, 3D printing, and traditional stone carving, depending on the desired level of detail and the chosen construction material. Common materials for these letters include high-density foam, fiberglass, resin, or real stone.
