This is my brand-new KAHLER X1 preset that I have created for Lightroom it can be used as a one-click or as an initial edit. This preset is perfect for days that are dark and moody, with the addition of a bit of direct light. For more examples, check out my Instagram. Temperature and exposure adjustments might require adjustments. There are 2 radial filters as well as 2 gradient filters which may also require to be moved One radial filter is utilized to sharpen the subject while the other filter is designed to blur the direction of the source of light in the photos.
