Blender Market - Vehicle Rig Factory Plus:

Vehicle Rig Factory Plus (VRF+) is an all-around blender plugin focused on rigging many vehicles, especially cartoon designs.

Made for Blender versions 3.0 and 4.0 and above, it has innovative features for riggers, including a flat tire simulator, tank wheels, wagon detachments, and advanced constraint systems. VRF+ has addressed complex rigging problems using unique methods proven in production.

About animators, VRF+ encompasses functionalities that allow the animator to split spline paths automatically, single input ground systems, attach-and-detach mechanisms for wagons, and even animate train wagons along splines. The most impressive features include IK wheels which allow rotation and dynamic pivot adjustments that enhance the cartoon realism for vehicle animations.
