

CData Drivers for Oracle SCM v24.0.9060 (21 Oct 2024) All Platforms + License Key

2024-12-18 23:04:45 [label](#) [我要反馈](#) [下载页面](#)

CData Drivers for Oracle SCM streamline integration of Oracle SCM data with reporting tools, databases, and custom applications. They ensure seamless connectivity with BI, analytics, reporting, and data visualization technologies, offering superior query performance and comprehensive data access. Additionally, these drivers facilitate robust data movement for ETL, replication, and warehousing, optimizing operational reporting, enhancing performance, and supporting data governance and disaster recovery.

With support for popular database protocols like ODBC, JDBC, and ADO.NET, CData Drivers simplify data management across various database management applications. They seamlessly integrate with workflow and automation tools, including BizTalk, MuleSoft, SQL SSIS, and Talend, ensuring smooth data flow and interoperability. Developers benefit from a data-centric model, accelerating application development and enabling faster deployment of high-quality solutions.

Furthermore, advanced features such as data virtualization abstract Oracle SCM data into a virtual database, enhancing performance and flexibility. This capability facilitates efficient management and utilization of Oracle SCM data across platforms and applications, empowering organizations to derive valuable insights for informed decision-making. Overall, offer a comprehensive solution for accessing, integrating, and managing Oracle SCM data, driving organizational efficiency and effectiveness.

This package includes the following components:

- Excel Add-In for Oracle SCM

标签

[Other](#) [Web & Script](#)

- Oracle SCM ADO.NET Provider
- Oracle SCM Data Cmdlets
- Oracle SCM Tableau Connectors
- Oracle SCM JDBC Driver
- Oracle SCM ODBC Driver
- Oracle SCM Power BI Connector
- Oracle SCM SSIS Components

Key Features of CData Drivers for Oracle SCM:

1. Seamless integration with BI, analytics, reporting, and data visualization technologies
2. Superior query performance and comprehensive data access
3. Robust data movement for ETL, replication, and warehousing
4. Support for popular database protocols like ODBC, JDBC, and ADO.NET
5. Simplified data management across various database management applications
6. Integration with workflow and automation tools such as BizTalk, MuleSoft, SQL SSIS, and Talend
7. Data-centric model for accelerated application development
8. Advanced features including data virtualization for enhanced performance and flexibility
9. Efficient management and utilization of Oracle SCM data across platforms and applications
