

## CData Drivers for Apache Phoenix v24.0.9060 (21 Oct 2024) All Platforms + License Key

2024-12-18 23:03:15   [label](#)   [我要反馈](#)   [下载页面](#)

**CData Drivers for Apache Phoenix** offer a seamless bridge to Apache Phoenix data integration, ensuring effortless connectivity with BI, Reporting, Analytics, ETL Tools, and Custom Solutions. Accessing live Apache Phoenix data becomes a breeze, enabling users to harness its power across various platforms, including BI, Analytics, Reporting, ETL, and Custom Applications. With unparalleled query performance and comprehensive access, these drivers seamlessly integrate Phoenix data into preferred analytics tools, facilitating enhanced reporting and data visualization experiences.

For ETL, Replication, and Warehousing needs, **CData Drivers for Apache Phoenix** provide robust and secure data movement solutions. These drivers extend the capabilities of ETL tools, ensuring reliable replication and warehousing processes. Leveraging standard database protocols like ODBC, JDBC, and ADO.NET, managing Phoenix data becomes efficient across a wide range of database management applications, enhancing overall data management workflows.

also streamline workflow and automation integration, seamlessly connecting Phoenix data with popular data migration, ESB, iPaaS, and BPM tools. Whether it's BizTalk, MuleSoft, SQL SSIS, or others, these drivers offer straightforward access to Phoenix data, facilitating smooth integration with various applications. Additionally, developers benefit from simplified Phoenix integration with a data-centric model, accelerating application development and enabling the creation of higher-quality solutions with ease.

**This package includes the following components:**

- Apache Phoenix ADO.NET Provider

标签

Web & Script

Other

- Apache Phoenix BizTalk Adapter
- Apache Phoenix Data Cmdlets
- Apache Phoenix FireDAC Components
- Apache Phoenix JDBC Driver
- Apache Phoenix MuleSoft Connector
- Apache Phoenix ODBC Driver
- Apache Phoenix Power BI Connector
- Apache Phoenix SSIS Components
- Apache Phoenix Tableau Connector
- Excel Add-In for Apache Phoenix

## Key Features of CData Drivers for Apache Phoenix :

1. Seamless integration with BI, Reporting, Analytics, ETL Tools, and Custom Solutions
2. Access to live Apache Phoenix data across BI, Analytics, Reporting, ETL, and Custom Applications
3. Unparalleled query performance and comprehensive access to Phoenix data
4. Reliable and secure data movement for ETL, Replication, and Warehousing needs
5. Extension of ETL tool capabilities for robust replication and warehousing processes
6. Support for standard database protocols like ODBC, JDBC, and ADO.NET
7. Efficient management of Phoenix data across a wide range of database management applications
8. Streamlined workflow and automation integration with popular tools such as BizTalk, MuleSoft, SQL SSIS, etc.
9. Simplified Phoenix integration for developers with a data-centric model
10. Accelerated application development and creation of higher-quality solutions
