平面设计

Blender Market – Shot Manager Pro v0.7.7: Shot Manager was designed to speed up rendering design and management by preserving frames, rendering camera view layers, and output routes. It's also great for splitting one timeline animation to create game animations and multi-cam rendering setups. Ideal for pre-production as well as independent creators.

- Primary View layers. Switch views active to the specific layer. -Visualisation, Animatics
- Preview Layer, to work using a shared preview layer. Film, Animatics
- Overlapping images for use and more complex render layers and multi-cam. Film Other
- Non-overlapping animations. -Games
- The shots are used as passes. Create complex render passes using overlapping shots, each with different render layers passes, and overrides.-Film, Visualisation.

Interactive Overlay - Re-time, trim, slice, and join images using the Overlay Tool in the 3D window.

Rule Book- Assign custom Rules to your Shots or create Macros with RNA Rules
