**New Year Collage Opener - AE Project VH-41937123:** New Year's Collage Opener is an enjoyable and natural template with lots of energy. The letters cut out are entirely made, and two color modes are offered. You can choose your color palette or create random high-saturated colors. As for the background, you could use your image or make your collage with the 60 elements provided (donuts, flower faces, animals, and more.) Don't forget both "clean" templates to create an enjoyable and brutal design.
