### Analogica Lab KODAK VISION3 200T Lut:

The "Analogica Lab KODAK VISION3 200T LUT" is a professional color grading tool that simulates the Kodak Vision3 200T 35mm film look.

It provides a vintage, cinematic style ideal for photographers, videographers, and content creators, adding nostalgic color tones and shadow effects to digital images.

Handcrafted by Italian colorist Analogica, the LUTs are compatible with major editing software, including Adobe Premiere, Final Cut Pro, DaVinci Resolve, Photoshop, and Lightroom.

The pack includes two LUTs: one for Rec709 Color Space and one for Universal LOG, enabling users to easily apply and adjust them for a unique and timeless aesthetic.
