What is Losaddos TUNDRA Vocal One-Shots

Vocal one-shots are typically short vocal recordings or phrases that can be easily incorporated into music tracks, providing a human touch or vocal texture to the music. They are commonly used in various electronic music genres, hip-hop, and more to add a unique and organic element to the music.

If you created and edited these vocal one-shots yourself, you have the creative freedom to integrate them into your music in a way that complements your production style. This can be a great way to add character and emotion to your tracks.
