We developed these LUTs to be used by creatives who are fast working in gun and run situations and want to elevate their video to the highest level. Designed to work with both light and dark skin tones, shooting with these LUTS on your field monitor/on-camera monitor allows you to add stylish tonality for a "what-you-see-is-what-you get" look, while maintaining full dynamic range. You can use them to impress your customers on set or require drag-and-drop effects to your newly wrapped shoot these LUTS will take your Sony SLOG-3 images to near final quality in a matter of minutes.
