CData Drivers for IBM Cloud Data Engine seamlessly connect IBM Cloud Data Engine services with various applications, offering swift access to real-time data for Business Intelligence (BI), Analytics, and ETL tasks. Designed for BI and Analytics, the drivers ensure high-performance queries and integration with leading analytics tools. They extend their utility to ETL, Replication, and Warehousing, providing robust, reliable, and secure data movement within preferred tools and supporting popular database protocols.

The drivers go beyond database connectivity, seamlessly integrating with workflow and automation tools for data migration, Enterprise Service Bus (ESB), integration Platform as a Service (iPaaS), and Business Process Management (BPM) tools. Developers benefit from the simplicity of integration and advanced data virtualization features, such as query federation and predicate pushdown, accelerating application development.

In summary, the empower users to efficiently connect, manage, and leverage IBM Cloud Data Engine data across applications, tools, and workflows, enhancing accessibility and utilization for BI, analytics, ETL, and broader data management tasks.

This package includes the following components:

- Excel Add-In for IBM Cloud Data Engine
- IBM Cloud Data Engine ADO.NET Provider
- IBM Cloud Data Engine BizTalk Adapter
- IBM Cloud Data Engine Cmdlets

- IBM Cloud Data Engine Data Cmdlets
- IBM Cloud Data Engine FireDAC Components
- IBM Cloud Data Engine JDBC Driver
- IBM Cloud Data Engine MuleSoft Connector
- IBM Cloud Data Engine ODBC Driver
- IBM Cloud Data Engine Power BI Connector
- IBM Cloud Data Engine SSIS Components
- IBM Cloud Data Engine Tableau Connector

Key Features of **CData Drivers for IBM Cloud Data Engine**：

1. Seamless integration with IBM Cloud Data Engine services
2. Swift access to real-time data for BI, Analytics, and ETL tasks
3. Designed for high-performance queries in BI and Analytics
4. Integration with leading analytics tools
5. Extends utility to ETL, Replication, and Warehousing
6. Robust, reliable, and secure data movement
7. Supports popular database protocols
8. Effortless connection and management of IBM Cloud Data Engine data
9. Integration with workflow and automation tools
10. Versatility for data migration, ESB, iPaaS, BPM, and more
11. Simplified integration for developers
12. Advanced data virtualization features
13. Query federation and predicate pushdown support
