Professional photographer, I have created for many years a large assortment of presets for Lightroom that facilitate my post-treatment work.

Presets Black Light and White Light add a toned of black to your photos. They are artistic, timeless, and high-quality.

This preset Black and White for Lightroom 4 (and the following) is perfect for processing your photos of portraits and weddings.

The presets will be sent to your email address immediately after you have submitted your order. They are ready for import into your LightRoom software.

Information:

- Each preset reacts differently depending on the type of photo you have applied him to.
- After purchase, no refunds can be made
- Both for personal and business use. Without my permission, it is strictly forbidden that you resell or deal in these files.
