#### Wedding Photos Slideshow (Videohive 4565295):

With this After Effects project, you can build a realistic slideshow on a photo album that opens up on a surface. This project is perfect for weddings, anniversaries, birthdays, and other events. The slideshow supports a never-ending loop, and there is an option for custom title slides. Using this project is easy. Just upload your pictures, and the project renders them. The package contains an AE Project file (which works on CC, CS6, CS5.5, and CS5), portrait and landscape photo placeholders, the option for seamless looping, and instructions on where to download the free font transfer. It's entirely After Effects compatible, so you don't need any extra software. The animation was created in Cinema 4D, so you won't need to render it yourself or use the animation.
