BlenderMarket – Transportation:

Transportation is a comprehensive Blender add-on designed for managing a library of 78 rigged HD and low-poly vehicles. It includes diverse vehicle types such as trucks, sports cars, motorcycles, airplanes, and boats, along with 65 professional HDRIs and 300+ backplates.

- **HD & Low-Poly Models:** Models can be used in various quality levels for optimal performance.
- **Rigged Vehicles:** Many models are animable and fully customizable with editable meshes, materials, and textures.
- **Snap to Ground & Asset Browser Ready:** Easy placement and integration into Blender workflows.
- **Car Paint Customization:** Choose from 70+ preconfigured shaders or create your own.
- **Photorealistic Rendering:** HDRIs and backplates enable quick, realistic integration with transparent shadows and accurate scaling.

The user-friendly interface and compatibility with Cycles and Eevee make this tool ideal for architects, designers, and CG artists, delivering high-quality, efficient rendering for complex scenes.
