What is Incorporating Photoshop Actions into your portrait workflow?

Incorporating Photoshop Actions into your portrait workflow can significantly streamline your editing process and help you achieve consistent and professional results. Actions in Photoshop are recorded sequences of steps that can be applied to your images with a single click.

Incorporating actions into your portrait workflow can save you time and help maintain consistency in your editing style. It's important to strike a balance between using pre-recorded actions and making manual adjustments, as not every portrait will require the same edits. Adapt your actions to the specific needs of each image while taking advantage of the efficiency they offer.
