Explainer World Characters (VH 54738266) - AE Project:

Explainer World is a versatile animation toolkit featuring standalone characters and projects, designed for easy integration into various presentations. It includes 60 pre-made characters and 20 themed projects, along with 50 pose animations for each character, allowing for rich storytelling. Users can customize characters, utilize a face controller with 12 emotions, and benefit from auto lip-sync face effects. The package offers 50 backgrounds, and over 1,000 animated icons across 54 categories, and is compatible with After Effects CS6 and 2019 and above, with resolutions up to 4K. The modular design and easy-to-use controllers facilitate seamless animation without the need for plugins, complemented by tutorial support for enhanced user experience.
