To search for similar products to AEJuice Newspaper Constructor for After Effects and Premiere Pro,

We've used images of actual newspapers to make texture in 4K to create ultra-realism, things that are accurate when you apply newspaper-like effects to your photos or videos.

The camera's movements were created using Cinema 4D and After Effects.

Each text and color, image, and background can be customized.

Newspaper Constructors can work with any font and language.

You can get as creative as putting your videos into Harry Potter-style papers with moving images. You can only upload the desired video and choose newspapers with the constructor effects.

The most important thing is that you'll be able to save time while getting top-quality animation. It'll pay for itself the first time and is a real treasure if you want to make these scenes regularly.
